

INTEGRATION OF TECHNOLOGY IN THE CLASSROOM

1. <http://www.4teachers.org>

This website helps teachers integrate technology into classrooms. It offers online tools and resources that have web lessons, quizzes, rubrics, and classroom calendars for the teacher and the students. This website addresses to English language learners at-risk or special-needs students.

2. <http://www.educationworld.com>

This website offers twenty ways to integrate technology into a daily routine in the classroom. It also provides a brief explanation about why it is important to use technology and how to make it useful. Some of the activities include spelling, math, history and science.

3. <http://www.questia.com>

This website offers you articles about integrating technology in the classroom. I found a particular journal that provides eight keys to success of integrating technology in a classroom. Unfortunately for this website I believe you need to pay for the articles and register. Overall I believe it provides good information.
